

SCIENCE DELIVERED

Avantor® is a trusted global provider of critical products and services that help our customers move science forward. Our offerings are powering innovation from scientific discovery to scale-up and commercial delivery. And through VWR®, our premier delivery platform, our customers receive seamless, standardized purchasing and fulfillment and innovative, customizable solutions and services.

One company. One mission. That's science delivered.

Through our pillars, Avantor helps customers make breakthroughs and achieve life-changing results.

Quality and choice

Our exclusive distribution network, VWR, offers trusted brands and over six million critical products. Our global ISO-certified, cGMP manufacturing facilities meet U.S. FDA standards.

Expertise

We support life-changing breakthroughs through deep ties to the scientific and pharmaceutical industries. Our world-class experts are dedicated to helping you meet goals for process improvement, time to market and innovation.

Convenience

Our global e-commerce platform, available through VWR.com, delivers seamless purchasing and a strong distribution network with responsive, local associates.

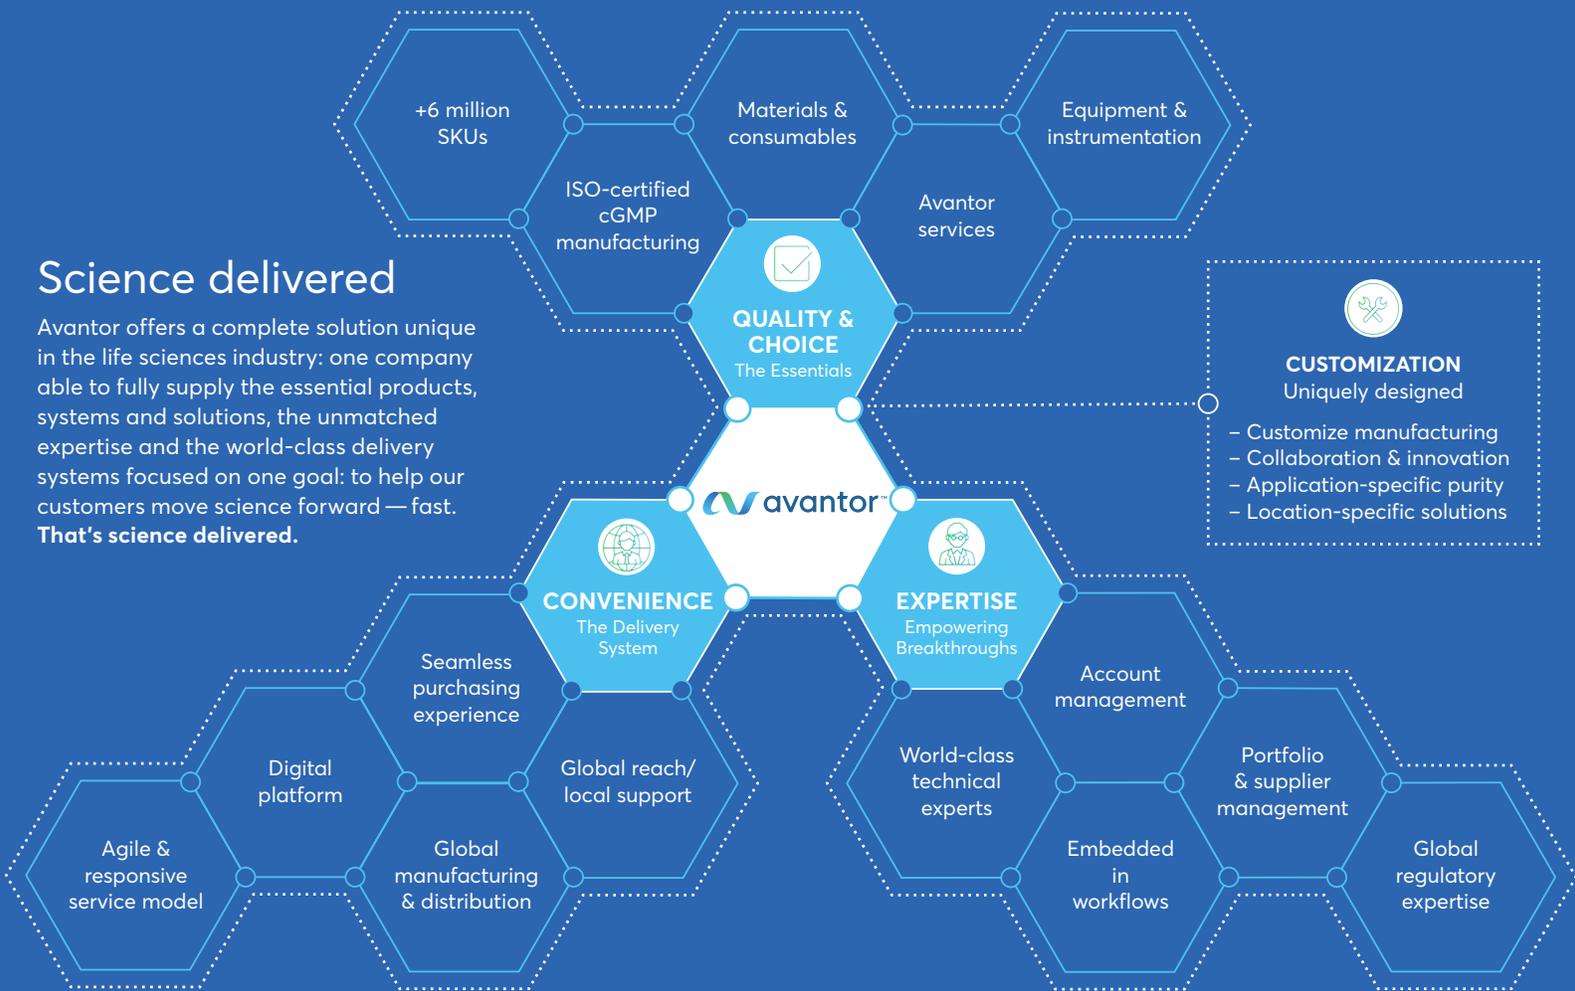

Customization

Our infrastructure is designed to adapt to every customer's unique needs, providing innovative, customizable manufacturing solutions and a full range of support services, wherever they are needed.

Science delivered

Avantor offers a complete solution unique in the life sciences industry: one company able to fully supply the essential products, systems and solutions, the unmatched expertise and the world-class delivery systems focused on one goal: to help our customers move science forward — fast. **That's science delivered.**
